

Overview

DDTC Project Team held an Industry focused webinar introducing the first release of the Defense Export Control and Compliance System (DECCS); the IT Modernization effort which will replace DTrade and EFS with an easy to use, online system that provides industry with a content rich home page, the ability to save work in progress, and the ability to copy in-progress or completed submissions. The Directorate for Defense Trade Control (DDTC) intends to do all data collection associated with export registration, commodity jurisdiction and licensing through DECCS.

DECCS Release #1 webinar encompasses the screens for online Commodity Jurisdiction (CJ) requests. This webinar included a demonstration of user authentication, log in, data entry, saving work in progress, submission of completed CJs and tracking of CJs.

Moderator

- Kimberly Hancher, DDTC IT Modernization Team, Industry Liaison (Contractor)
- Meredith Carlton, Project Manager- Release CJ Module
- Kelly Via, Business Analyst
